COMPUTER ENGINEERING

QUEZON CITY

COURSE CODE/TITLE:	CPE-010: Data Structures and Algorithm	**SECTION:**	CPE21S3
DATE PERFORMED:	10 / 13 / 26	**DATE SUBMITTED:**	10 / 15 / 26
NAME/S:	Bautista, Troy Jerron A. Fabonan, Kurt Lorenz C. Geronimo, Joncel Zairho G. Salcedo, Lance Cristopher S. Santos, Paterno Miguel R.	**INSTRUCTOR:**	Engr. Jimlord Quejado

Seatwork No #11.1 **Planning**

1. PROCEDURE OUTPUT

Our 3 proposals:

1. **Small-store inventory system**: Tracks products, stock levels, low-stock items.
2. **Room Availability Tracker**: Searches for school room schedules, for a requested time and suggests the nearest available room that meets the user's needs.
3. **Library borrowing system**: tracks books, borrowers, book returns, overdue books.

Task	Lead responsibility	WEEK 1	WEEK 2	WEEK 3
Define the system's purpose, requirements, and project scope	All members contribute	■		
Plan the user interface and system workflow	All members contribute	■		
Choose the data structures and algorithm suited to the system	All members contribute	■	■	
Develop the main system features algorithm	All members contribute		■	
Connect the interface, data, and main features	All members contribute		■	
Test the system and fix issues	All members contribute		■	■
Prepare the report, presentation, and demonstration	All members contribute			■

10 Questions about the Room Availability Tracker

1. Who can use the Room Availability Tracker to search for available school rooms?
2. What information must be entered to search for a room?
3. Where is the school's room schedule currently stored?
4. What conditions make a room unavailable?
5. How does the Room Availability Tracker verify that a room is available for the full requested time?
6. What room requirements must the Room Availability Tracker consider when matching a room to a request?
7. What location should the Room Availability Tracker use as the starting point when ranking rooms by distance?
8. How frequently should room availability information be updated?
9. Who is responsible for updating room availability when a schedule changes?
10. What should the Room Availability Tracker display when no room matches the request?

2. ANSWERS TO SUPPLEMENTAL ACTIVITY

Copy and paste the questions from the lab and include your answers after.

3. ARTIFICIAL INTELLIGENCE (AI) USE DISCLOSURE STATEMENT

I hereby declare that artificial intelligence (AI) tools were used, if applicable, in the preparation of this academic work. The following indicates the nature and extent of AI assistance:

Tools Used: _____

Examples: ChatGPT, Microsoft Copilot, Grammarly, QuillBot, etc.

Purpose of Use: _____

Examples: grammar correction, idea generation, formatting, summarization, code assistance, explanation of concepts, etc.

Extent of Use: _____

Explain how AI was used and confirm that it did not replace original thinking, analysis, authorship, or completion of the required work.

By submitting this activity, I affirm that my use of AI complies with T.I.P.'s AI usage policy and does not exceed the permitted limits for similarity, automated content generation, or academic assistance.

I understand that any false, incomplete, or misleading disclosure may be subject to investigation in accordance with due process and may result in sanctions for violation of existing T.I.P. policies.

Lab activities, templates, and related instructional materials shall not be reuploaded, reproduced, distributed, or shared with external organizations or third parties without the prior express written permission of the Technological Institute of the Philippines.
